U-MULTIRANK 2020

Chinese Universities in Global Comparison
U-Multirank is a unique, multidimensional and international ranking of higher education institutions. It compares university performance across teaching and learning, research, knowledge transfer, international orientation and regional engagement. It is the largest and most inclusive ranking showcasing the diversity in higher education around the world. It is not a league table and does not use composite indicators, nor reputation weights. Therefore, there is no one best university in U-Multirank. The performance of a university is presented with individual scores – graded from ‘A’ (very good) to ‘E’ (weak) across the different areas.

U-Multirank’s 2020 edition presents data on 117 Chinese higher education institutions. For the full list of all universities from China included in U-Multirank, please visit our website.
The 2020 edition of U-Multirank includes 117 universities from China, incl. Hong Kong and Macau. Most of them are presented only with bibliometric and patent data in the Research and Knowledge Transfer Dimensions.

4 Chinese universities have 10 or more top group positions (‘A’) scores: The University of Macau, Tongji University, Peking University and Tsinghua University.

Based on the data on research and knowledge transfer Chinese universities perform strongly in the Research Dimension. Over 70% of all indicator scores of Chinese universities in the Research Dimension are better than average (groups ‘A’ or ‘B’). In the Knowledge Transfer Dimension, almost half the scores are below average.

12 universities made it into one of our 10 lists of Global Top 25 Performers, most of them in terms of their absolute number of research publications (Peking University, Shanghai Jiao Tong University, Tsinghua University, the University of the Chinese Academy of Sciences and Zhejiang University) and in the (size-normalised) number of patents awarded (Hong Kong Baptist University, Hong Kong University of Science and Technology, South China University of Technology and Tsinghua University).

The 2 branches of China University of Petroleum in Beijing and Qingdao are both listed for co-publications with industrial partners. Hunan University is listed for its high percentage of top-cited publications. Moreover, Beijing Union Medical College is ranked among the global Top 25 regarding their percentage of academic publications in open access journals.
In this section we highlight the universities receiving the highest number of ‘A’ (very good) scores on the institutional level for the respective country. Although the number of ‘A’ scores shows top performance for the respective university, it does not imply one university is the ‘best’ in the country, as each university profile highlights different strengths.

The list includes different profiles of institutions: comprehensive universities, as well as business schools and technical universities.
WHAT ARE THE PERFORMANCE PROFILES OF CHINA TOP SCORING UNIVERSITIES?

Using our unique sunburst chart, a clear picture is shown of the university’s overall performance (the longer the bar, the higher the score).

*For a list of definitions and calculations of indicators, see our Indicator Book.
Globally Top Performing Chinese Universities

In this section, U-Multirank presents the global Top 25 performers in a set of 10 indicators measuring different dimensions of performance. These lists highlight the 25 top-performing universities from around the world with the highest scores.

Chinese universities that have achieved a global Top 25 score are listed under the respective categories:

Co-publications with industrial partners
- China University of Petroleum, Beijing
- China University of Petroleum, Qingdao

Open access publications
- Beijing Union Medical College

Patents awarded (size-normalised)
- Hong Kong Baptist University
- Hong Kong University of Science and Technology
- South China University of Technology
- Tsinghua University

Research publications (absolute numbers)
- Peking University
- Shanghai Jiao Tong University
- Tsinghua University
- University of the Chinese Academy of Sciences
- Zhejiang University

Top-cited publications
- Hunan University

*For the full lists of all global Top 25 performers, please visit our website.*
Chinese higher education institutions perform strongest in U-Multirank’s Research dimension.

Above or below average?

In this section we highlight the overall performance of Chinese universities on the institutional level per U-Multirank dimension.

The below table shows the national breakdown of Chinese universities and how they stand across the spectrum of above average (receiving a score of ‘A’ (very good) or ‘B’ (good)), or below average (receiving a score of ‘D’ (below average) or ‘E’ (weak)). In doing so, U-Multirank offers a clear picture on the countries strengths, and areas for improvement.

WHAT IS U-MULTIRANK?

U-Multirank is a multidimensional, user-driven approach to international ranking of higher education institutions. It compares the performances of higher education institutions – in short: universities – in the five dimensions of university activity:

(1) teaching and learning, (2) research, (3) knowledge transfer, (4) international orientation and (5) regional engagement.

The U-Multirank web tool enables comparisons at the level of the university as a whole and at the level of specific study programmes. Based on empirical data, U-Multirank compares institutions with similar institutional profiles (‘like-with-like’) and allows users to develop their own personalised rankings by selecting indicators in terms of their own preferences.

Based on the results of a feasibility study covering 150 universities which was carried out in 2010/11, the European Commission decided to fund the implementation of U-Multirank. This roll out is carried out by a consortium led by Professor Frans van Vught of the Center for Higher Education Policy Studies (CHEPS), University of Twente in The Netherlands and Professor Frank Ziegele of the Centre for Higher Education (CHE) in Germany as well as the Centre for Science and Technology Studies (CWTS) from Leiden University, Fundacion CYD and Folge 3. U-Multirank is funded by the European Commission, the Bertelsmann Foundation and Banco Santander. The consortium also works closely with a range of national ranking partners and stakeholder organisations.

The work of the U-Multirank consortium is overseen by an Advisory Board.
