U-MULTIRANK 2021

British Universities in Global Comparison
U-MULTIRANK 2021

U-Multirank is a unique, multi-dimensional and international ranking of higher education institutions. It compares university performance across teaching and learning, research, knowledge transfer, international orientation and regional engagement. It is the largest and most inclusive ranking showcasing the diversity in higher education around the world. It is not a league table and does not use composite indicators, nor reputation weights. Therefore, there is no one best university in U-Multirank. The performance of a university is presented with individual scores – graded from 'A' (very good) to 'E' (weak) across the different areas.

U-Multirank’s 2021 edition presents data on 165 British higher education institutions. For the full list of all universities from the United Kingdom included in U-Multirank, please visit our website.

9  APPENDIX: HOW CAN DETAILED RESULTS BE PRESENTED?

10 WHAT IS U-MULTIRANK?
In 2021, U-Multirank covers 165 higher education institutions, which is a full coverage.

In global perspective, UK universities are strong in the Teaching & Learning and International Orientation dimensions.

The strong performance of UK universities is shown by the fact that 28 universities reached top positions ('A' scores) in ten or more indicators. These universities received their top scores across all five U-Multirank dimensions.

Across the five U-Multirank performance dimensions, the institutions with the highest number of 15 top scores are: University of Cambridge (15), Cranfield University, Imperial College London, King's College London, University College London (each 14), followed by the universities Southampton, Manchester, and Oxford (each 13).

In our selection of ten indicators, eight UK universities received 16 global 'Top 25 Performers' entries. Two universities are listed for three indicators: The Institute of Cancer Research (Co-Publications with Industrial Partners, Regional Joint Publications, and Top Cited Publications) and the London School of Hygiene and Tropical Medicine (International Joint Publications, Open Access Publications, Patents Awarded (size-normalised). The highest number of UK universities are listed for Research Publications – absolute number (5) and Top-cited Publications (5).
In this section we highlight the universities receiving the highest number of ‘A’ (very good) scores on the institutional level for the respective country.

Although the number of ‘A’ scores shows top performance for the respective university, it does not imply one university is the ‘best’ in the country, as each university profile highlights different strengths.

Eight British universities have achieved a global Top 25 score in 2021.

**Globally Top Performing British Universities**

In this section, U-Multirank presents the global Top 25 performers in a set of 10 indicators measuring different dimensions of performance. These lists highlight the 25 top-performing universities from around the world with the highest scores.

British universities that have achieved a global Top 25 score are listed under the respective categories:

**Co-publications with industrial partners**
- The Institute of Cancer Research

**International joint publications**
- London Business School
- London School of Hygiene and Tropical Medicine

**Open access publications**
- London School of Hygiene and Tropical Medicine

**Patents awarded**
- London School of Hygiene and Tropical Medicine

**Regional joint publications**
- The Institute of Cancer Research

HOW DO BRITISH UNIVERSITIES PERFORM GLOBALLY?

British higher education institutions perform strongest in U-Multirank’s Teaching & Learning dimension.

Above or below average?

In this section we highlight the overall performance of British universities on the institutional level per U-Multirank dimension.

The below table shows the national breakdown of British universities and how they stand across the spectrum of above average (receiving a score of ‘A’ (very good) or ‘B’ (good)), or below average (receiving a score of ‘D’ (below average) or ‘E’ (weak)). In doing so, U-Multirank offers a clear picture on the countries strengths, and areas for improvement.
If you want to analyse further the performance of the universities in your country you can click the following links.

The below links lead directly to the national results pages where we pre-filtered the universities in your country into one list (for the university as a whole and for the subject areas included in U-Multirank so far). You can use the table to produce national rankings (see image below), or for personalised interactive analyses with the data.

If you're interested in tailor-made tables (institutional level, subject level, or with a specific focus in mind, such as internationalisation), please contact us, at info@umultirank.org. These links are also accessible via your country’s ‘Study in’ page.

- [Overview Infographic 2021]
U-Multirank is a multidimensional, user-driven approach to international ranking of higher education institutions. It compares the performances of higher education institutions – in short: universities – in the five dimensions of university activity:

(1) teaching and learning, (2) research, (3) knowledge transfer, (4) international orientation and (5) regional engagement.

The U-Multirank web tool enables comparisons at the level of the university as a whole and at the level of specific study programmes. Based on empirical data, U-Multirank compares institutions with similar institutional profiles ('like-with-like') and allows users to develop their own personalised rankings by selecting indicators in terms of their own preferences.

Based on the results of a feasibility study covering 150 universities which was carried out in 2010/11, the European Commission decided to fund the implementation of U-Multirank. This roll out is carried out by a consortium led by Professor Frans van Vught of the Center for Higher Education Policy Studies (CHEPS), University of Twente in the Netherlands and Professor Frank Ziegele of the Centre for Higher Education (CHE) in Germany as well as the Centre for Science and Technology Studies (CWTS) from Leiden University and Fundacion CYD. U-Multirank is funded by the European Commission, the Bertelsmann Foundation and Banco Santander. The consortium also works closely with a range of national ranking partners and stakeholder organisations.

The work of the U-Multirank consortium is overseen by an Advisory Board.
