U-MULTIRANK 2022

Czech Universities in Global Comparison
U-Multirank is a unique, multi-dimensional and international ranking of higher education institutions. It compares university performance across teaching and learning, research, knowledge transfer, international orientation and regional engagement. It is the largest and most inclusive ranking showcasing the diversity in higher education around the world. It is not a league table and does not use composite indicators, nor reputation weights. Therefore, there is no one best university in U-Multirank. The performance of a university is presented with individual scores – graded from 'A' (very good) to 'E' (weak) across the different areas.

U-Multirank’s 2022 edition presents data on 14 Czech higher education institutions. For the full list of all universities from the Czech Republic included in U-Multirank, please visit our website.
U-Multirank 2022 presents data on 14 higher education institutions from the Czech Republic, universities as well as non-university institutions.

In global perspective, Czech higher education institutions perform strongest in the dimension International Orientation.

The Czech institutions with the highest number of top group positions ('A' scores) are University of Chemistry and Technology, Prague (11), Tomas Bata University in Zlín (9), Institute of Technology and Business in České Budějovice (9), Mendel University in Brno (8), and University of West Bohemia (8).

All of these institutions have the highest number of top group positions in the dimension of Research.

**WHICH ARE THE TOP PERFORMING UNIVERSITIES IN THE CZECH REPUBLIC?**

In this section we highlight the universities receiving the highest number of ‘A’ (very good) scores on the institutional level for the respective country. Although the number of ‘A’ scores shows top performance for the respective university, it does not imply one university is the ‘best’ in the country, as each university profile highlights different strengths.

In 2022, University of Chemistry and Technology, Prague received the highest number of ‘A’ (very good) scores for The Czech Republic.
WHAT ARE THE PERFORMANCE PROFILES OF THE CZECH REPUBLIC’S TOP SCORING UNIVERSITIES?

Using our unique sunburst chart, a clear picture is shown of the university's overall performance (the longer the bar, the higher the score).

For a list of definitions and calculations of indicators, see our Indicator Book.
Above or below average?

In this section we highlight the overall performance of Czech universities on the institutional level per U-Multirank dimension. The below table shows the national breakdown of Czech universities and how they stand across the spectrum of above average (receiving a score of 'A' (very good) or 'B' (good)), or below average (receiving a score of 'D' (below average) or 'E' (weak)). In doing so, U-Multirank offers a clear picture on the country's strengths, and areas for improvement.

FAQ
WHAT IS U-MULTIRANK?

U-Multirank is a multidimensional, user-driven approach to international ranking of higher education institutions. It compares the performances of higher education institutions – in short: universities – in the five dimensions of university activity: (1) teaching and learning, (2) research, (3) knowledge transfer, (4) international orientation and (5) regional engagement.

The U-Multirank web tool enables comparisons at the level of the university as a whole and at the level of specific study programmes. Based on empirical data, U-Multirank compares institutions with similar institutional profiles ('like-with-like') and allows users to develop their own personalised rankings by selecting indicators in terms of their own preferences.

Based on the results of a feasibility study covering 150 universities which was carried out in 2010/11, the European Commission decided to fund the implementation of U-Multirank. This roll out is carried out by a consortium led by Professor Frans van Vught of the Center for Higher Education Policy Studies (CHEPS), University of Twente in the Netherlands and Professor Frank Ziegele of the Centre for Higher Education (CHE) in Germany as well as the Centre for Science and Technology Studies (CWTS) from Leiden University and Fundacion CYD. U-Multirank is funded by the European Commission, the Bertelsmann Foundation and Banco Santander. The consortium also works closely with a range of national ranking partners and stakeholder organisations.

The work of the U-Multirank consortium is overseen by an Advisory Board.
