U-Multirank is a unique, multidimensional and international ranking of higher education institutions. It compares university performance across teaching and learning, research, knowledge transfer, international orientation and regional engagement. It is the largest and most inclusive ranking showcasing the diversity in higher education around the world. It is not a league table and does not use composite indicators, nor reputation weights. Therefore, there is no one best university in U-Multirank. The performance of a university is presented with individual scores – graded from 'A' (very good) to 'E' (weak) across the different areas.

U-Multirank’s 2022 edition presents data on 106 German higher education institutions. For the full list of all universities from Germany included in U-Multirank, please visit our website.
In 2022, U-Multirank presents data on 106 German higher education institutions, including universities as well as universities of applied science.

Comparing the performance of German institutions with the global U-Multirank sample shows they perform strongly in International Orientation with 66% of all indicator scores ranked above average (group ‘A’ or ‘B’).

Twelve German institutions achieved top group positions (‘A’ scores) in more than ten indicators. The institutions with the highest number of ‘A’ scores are: WHU - Otto Beisheim School of Management (16 ‘A’ scores), Jacobs University (15), the Technical University of Munich (14), RWTH Aachen University (14); followed by Kühne Logistics University and the Karlsruhe Institute of Technology (KIT) (each 13).

While only one of these institutions has an ‘A’ score in Regional Engagement (KIT), and only a few in the Teaching and Learning dimension, their performance is strong in Research, Knowledge Transfer and International Orientation.
WHICH ARE THE TOP PERFORMING UNIVERSITIES IN GERMANY?

WHU - Otto Beisheim School of Management received the highest number of ‘A’ (very good) scores on the institutional level for Germany in 2022.

Although the number of ‘A’ scores shows top performance for the respective university, it does not imply one university is the ‘best’ in the country as each university profile highlights different strengths.

The list includes different profiles of institutions: comprehensive universities, technical universities as well as business schools.
WHAT ARE THE PERFORMANCE PROFILES OF GERMANY'S TOP SCORING UNIVERSITIES?

Using our unique sunburst chart, a clear picture is shown of the university's overall performance (the longer the bar, the higher the score). For a list of definitions and calculations of indicators, see our Indicator Book.

FAQ
WHAT IS U-MULTIRANK?

U-Multirank is a multidimensional, user-driven approach to international ranking of higher education institutions. It compares the performances of higher education institutions – in short: universities – in the five dimensions of university activity:

(1) teaching and learning, (2) research, (3) knowledge transfer, (4) international orientation and (5) regional engagement.

The U-Multirank web tool enables comparisons at the level of the university as a whole and at the level of specific study programmes. Based on empirical data, U-Multirank compares institutions with similar institutional profiles ('like-with-like') and allows users to develop their own personalised rankings by selecting indicators in terms of their own preferences.

Based on the results of a feasibility study covering 150 universities which was carried out in 2010/11, the European Commission decided to fund the implementation of U-Multirank. This roll out is carried out by a consortium led by Professor Frans van Vught of the Center for Higher Education Policy Studies (CHEPS), University of Twente in the Netherlands and Professor Frank Ziegele of the Centre for Higher Education (CHE) in Germany as well as the Centre for Science and Technology Studies (CWTS) from Leiden University, Fundacion CYD and Folge 3. U-Multirank is funded by the European Commission, the Bertelsmann Foundation and Banco Santander. The consortium also works closely with a range of national ranking partners and stakeholder organisations.

The work of the U-Multirank consortium is overseen by an Advisory Board.
